Patented Rounding Prevention Technology (RPT)

RPT HEX

- Bi-Directional
- For new and damaged fasteners
- Up to 400% more torque on damaged hex fasteners
- Up to 50% more torque on new hex fasteners
- Professional grade S2 Steel

STANDARD HEX

- Only works on like new hex fasteners
- Low torque
- Lower grade steel prone to rounding
- Outdated design causes damage to the hex head

Discover the power of **GRIPEDGE™ Tools**, now available through ASI as your trusted distributor. Engineered with professional-grade **S2 steel** and innovative **Rounding Prevention Technology (RPT)**, these bi-directional extractors tackle both new and damaged fasteners like never before. Unlike standard hex tools that push material outward and cause rounding, GripEdge pulls the material inward for a superior hold, delivering up to **400% more torque** on damaged hex fasteners and **50% more** on new ones. Available in a variety of shapes and sizes from hex to star to T-handles and more, GripEdge delivers **unmatched grip and performance** for every job.
